

Flying Farmer History

International Flying Farmers is an organization of families with a mutual interest in the promotion and use of airplanes in agriculture. The organization, founded in 1944, consists of state and provincial chapters throughout North America. While originally founded by farmers and ranchers who owned aircraft, the membership now consists of individuals from all walks of life, from storeowners, and factory workers to bankers and lawyers. Direct involvement in agriculture or aviation is not, in and of itself, a requirement for membership.

Purpose

The purpose of the organization is: To create and maintain a compact representative and centralized organization with a spirit of cooperation and mutual helpfulness among its members; to explore and emphasize the importance of flying and the use of the airplane in agricultural production, including the breed, raising and feeding of livestock; and to engage in research and extension service, including publishing magazines or other periodicals to disseminate among its members information pertaining to the purposes of the organization.
